

# Accessing IGBMC services from outside

## Remote desktop

[Remote desktop page in French on IT](#)

Download the configuration file:

- [for Windows](#)
- [for MacOS](#)
- [for Linux](#)

### On windows

- Double click on the configuration file
- Type your login in the format *IGBMC\login* and your password

### On MacOS

- Check that Microsoft Remote Desktop is installed (or install it from AppStore)
- Double click on the configuration file
- Type your login in the format *IGBMC\login* and your password

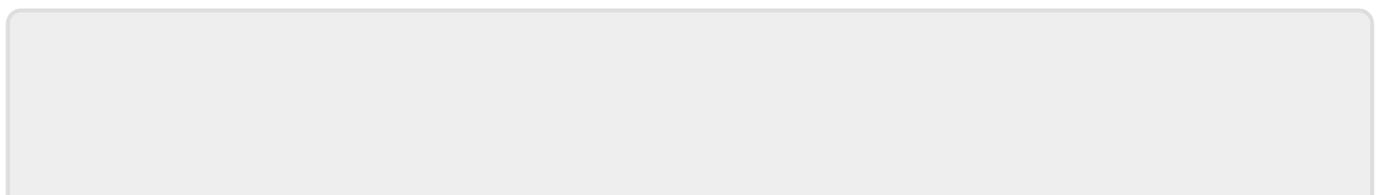

### On Linux

- Check that Remmina is installed (or [install it](#))
- Import the configuration file in Remmina
- Edit the new line that appeared in Remmina
- Ype your login and password
- Double click on the edited line to log in

## SSH access

You can access to IGBMC network through ssh either through:

- a gateway `ssh -XC login@passh.u-strasbg.fr`
- the hpc `ssh-XC login@hpc.igbmc.fr`
