C'est prêt. Les espaces projets sont exportés en NFS vers tes machines. Il suffit ensuite, sur chaque machine, de faire :

```
sudo mkdir -f /shared/mendel/projects/StardX
sudo mount -t nfs mendel.igbmc.u-strasbg.fr:/projects/StardX
/shared/mendel/projects/StardX
sudo mkdir -f /shared/mendel/projects/InsiPRMTs-PRMT9
sudo mount -t nfs mendel.igbmc.u-strasbg.fr:/projects/InsiPRMTs-PRMT9
/shared/mendel/projects/InsiPRMTs-PRMT9
sudo mkdir -f /shared/mendel/projects/InsiPRMTs-PRMT2
sudo mount -t nfs mendel.igbmc.u-strasbg.fr:/projects/InsiPRMTs-PRMT2
/shared/mendel/projects/InsiPRMTs-PRMT2
sudo mkdir -f /shared/mendel/projects/InsiPRMTs-PRMT4
sudo mount -t nfs mendel.igbmc.u-strasbg.fr:/projects/InsiPRMTs-PRMT4
/shared/mendel/projects/InsiPRMTs-PRMT4
```
