

Weighing CMR or T-labelled chemicals

All toxic (SGH6 « T, T+ » picto), carcinogenic, mutagenic, reprotoxic or sensitizing (SGH08 « CMR » picto) hazardous chemicals, have to be stored in room 0025 at IGBMC (« petits produits ») and weighed using the secured weighting system (SWS).

Weighing these chemicals (or re-weighing aliquots) in the labs or in the technical spaces of the Institute is DANGEROUS for you and your colleagues and is therefore strictly prohibited !
